

"I really love the geophysics program at CSM. Between the classes and field camp you get a lot of real-world experience that you can't get anywhere else."

- Roy Bowling
Undergraduate

"Different groups work on varied topics, which broadens the students' awareness of the field. Also, you get to interact with really smart people from all over the world."

- Nishant Kamath
Graduate student

A student perspective

“The faculty are approachable and friendly, my classmates are helpful and a lot of fun. It honestly feels like a big family. I couldn’t be happier!”

- Joseph Halloran
Undergraduate

“This department is an ideal academic environment to learn all of the aspects of applied geophysics. I believe that all I am learning will be a stepping stone forward in my career.”

- Chinaemerem Kanu
Graduate student

Highlights

World renowned faculty

- Specialists in gravity, electro-magnetics, seismic, petrophysics, planetary exploration, hydrology, climate, and more!

Annual field camp

- Hands on application of methods learned in coursework

Access to equipment

5 year combined Bachelor-Masters program

Employment

Between 2012 and 2014, 124 geophysics students completed a degree program.

Over 100 institutions attend the bi-annual career fair to recruit geophysics students. Average starting salaries are listed in the table below.

Degree	Placement	Average Annual Salary
Bachelor	100%	\$72,815
Master	100%	\$103,048
Doctorate	100%	\$115,867*
